

The background is a dark blue gradient with various light blue icons and patterns. These include a DNA double helix, a syringe, a pill, a heart with an ECG line, a person silhouette, a first aid kit, and a clipboard. There are also several hexagonal shapes and a network of lines connecting dots, suggesting a molecular or technological structure.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

Healthcare businesses need reliable IT infrastructure and [healthcare IT consulting services](#) that keep them on top of every complicated aspect of the industry, including HIPAA and HITECH compliance, Patientcare, insurance provider relationships, patient billing, and much more.

SorceTeck Technology Group, provide you with an actionable IT infrastructure roadmap that outlines all the important goals in their journey to a better IT Infrastructure. Once we start working towards a goal in the journey, we focus our efforts of improvement equally on three distinct aspects of the IT Infrastructure: the **people** that are intended to benefit from the system, the **processes** that are intended to be managed through the system, the **technology** that is intended to automate the system.

IT SERVICES OFFERINGS

Your business depends on reliable technology that just needs to work. We work with you to create a custom IT solution that fits your specific needs.

**TOP SERVICES FOR HEALTHCARE
TEAMS**

CONSULTING**

**HIPAA
COMPLIANCE**

**VIRTUAL
DESKTOPS**

IT Support & Consulting

You don't need distractions. The right technology drives your business forward, but the daily monitoring, regular maintenance and troubleshooting can be burdensome. We combine proactively heading problems off with solving any that arise.

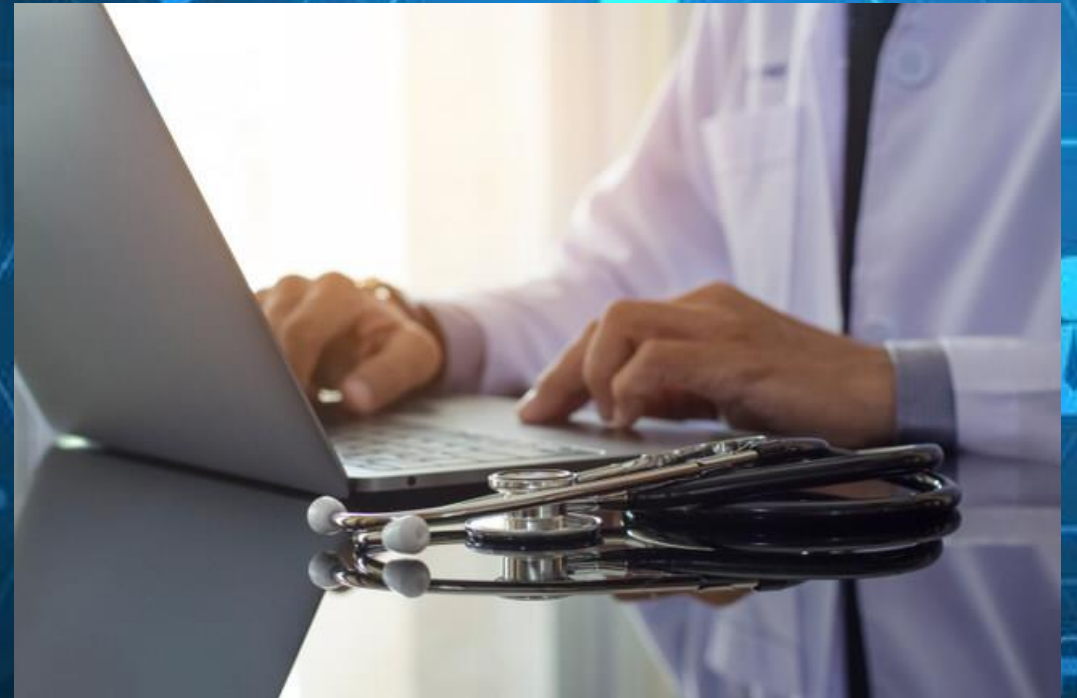

Our [support services](#) mean we're connected to you 24/7 so that you can focus solely on the mission and goals of your organization. Our services include taking support calls, installing software, regular maintenance, repairs, solving password issues, onboarding new employees and more.

HIPAA Compliance

Hardware maintenance is the cleaning, repairing, testing and upgrading of all physical components of your computer. This includes your hard drive, internal CD and DVD, monitor, mouse, keyboard and more.

Proper maintenance of your hardware extends the life of your computer and ensures it's running at its most optimal. [SorceTek's hardware maintenance solutions](#) focus on both the system-level and physical-level health of all your computer components.

Virtual Desktops

VIRTUALIZATION SOFTWARE

Virtual Desktops usually rely on virtualization software to mimic hardware capabilities. Operating systems, data and applications are abstracted from the computing device's underlying hardware.

A desktop operating system runs inside a virtual machine (VM) that can be installed on an on-site server, a cloud server or on a PC. The main reason to run it on a PC is that it allows multiple desktops to be created.
