APPROACH

CUSTOM IT SOLUTIONS

We believe every business is different and deserves a custom IT solution. Your IT stack should work for you and your business to increase productivity, protect vital data, and ultimately help you serve your customers.

Before we start, we'll sit down together and discuss your unique pain points. After we have a clear understanding of your needs, we'll make recommendations, and implement solutions.

WHY SORCETEK?

- **Better Protection:** We keep our finger on the pulse of cybersecurity in order to provide optimal protection for your business and data.
- **Reliable Partnerships:** Our personal investment in your vision means we partner with you to ensure your tech helps to make it a reality.
- **Improved Productivity:** Proper tech, training and support means your employees can focus on their own goals and expertise – instead of IT issues.
- **Increased Profitability:** Maximum efficiency of your tech stack and workflow designs translates to a better bottom line.

WHAT WE DO

- **Managed IT Services**

Small Business

From one small business to another, we've got your back. We provide technology, IT services for small business, and support that can keep up with your ambitions.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

Building your dream is exciting! We provide small business IT support services so that — instead of worrying about small business IT services — you can focus on your dreams and goals. We take over the responsibility of all the required [managed IT services for small business](#) to ease some of your inevitable stress.

Law Firms

Keeping DFW legal teams compliant and secure against cyber attacks. Providing reliable IT professionals and IT services for law firms to help maintain a reliable legal workflow.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

A law firm's IT infrastructure must ensure attorney-client privilege and safeguard private information. To law firms, SorceTek provides managed IT services for law firms with the help of its technology team.

SorceTek also offers law firm IT tech security services to law firms in order to provide a stable and effective cybersecurity program that constantly monitors for potential breaches.

Engineering

Powerful and secure technology solutions for even the most complex and ever-expanding engineering projects.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

Engineering firms require substantial data storage and dependable communication. Data losses and connection outages can be disastrous for time-sensitive, intensely focused work. A trustworthy IT and cybersecurity infrastructure are imperative. SorceTek's managed IT services for engineering firms allow you to position your engineering firm for success by providing you with all the necessary technology. Software, hardware, seamless internal and external communication, and access to cloud technologies.

Healthcare

Complying with industry regulations, ensuring privacy, and streamlining healthcare.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

Healthcare businesses need reliable IT infrastructure and healthcare IT consulting services that keep them on top of every complicated aspect of the industry, including HIPAA and HITECH compliance, Patientcare, insurance provider relationships, patient billing, and much more.

Financial Services

Following state and federal regulations, protecting assets, and facilitating transactions.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

Financial information and services are more digitized and online than ever as customers demand speed and convenience. Reliable IT services for financial institutes are now more important than ever before.

Architecture Firms

Providing dependable storage and timely IT support so that you can stay competitive and run your Architectural Firm on your own terms. You architect the world, and we architecture managed IT services for architecture firms.

MITIGATE SECURITY RISKS MANAGED IT + SECURITY

The architectural industry grows more reliant on technology as precise calculations and designs demand increasingly sophisticated, state-of-the-art systems. Your competitive edge requires IT managed services for architecture firms to implement systems that help you meet deadlines on a budget.
